

PARTH-Conference Bridge

Embedded Telephone Conference Bridge

About Aria

Started in the year of 2003, the company has progressed itself to become a global leader in voice processing industry. We have defined, developed and designed world-class technology integrated PC based voice processing systems, in order to serve corporate houses and simplify their business work processes. All products developed on our end are fully tested for stability and performance on various platforms like PCs and voice processing cards. Our zest to integrate innovation and high-standard technology with business processes has helped in turning PCs into, IP PBX, Unified Communication System, voice loggers and IVR systems that promise extra ordinary performance.
